LATE AND IMPORTANT INFORMA TION FROM THE REBELS.

ontain little of importance not previously elegraphed. A passenger by a late steams reports a skirmish at the Tallahatchie, be ween the advance of Grant's army under Col. lwcen the advance of trant's army under Col. Lee, on Sunday. The rebels met our forces at first with considerable show of resistance, but after a short time fell back under a charge, leaving even their batteries upon the ground, which was captured and carried off the field. The loss on the rebel side must have been

The report for this year exhibits a very healthy financial condition of the Post Office Department, and shows it to be thoroughly impregnated with the spirit of improvement. The efficiency of the service has been main tained at the highest point, accompanied by a great diminution of expenditures. To great diminution of expenditures. To great diminution of expenditures. To great year, including the standing Treasure eredit for free main matter, and a ning amount appropriated for the reliet of including the standing the s

an effort made to adopt a standard of merit and of administrative efficiency, in lieu of other and inferior motives for appointment. The Postmoster General expresses his determination to adhere to this course.

The number of postage stamps issued to postmasters during the year was 7,673, 135. 50. The value of inter envelopes \$733, 335. 50. The value of stamped newspacer wrappars, \$25,660.50; increase of issue over 1851, \$1,144.558. The total value sold was \$6,910,-101.69.

The increasing demand on the part of the public for the stamped newspaper shows that their introduction has satisfied a public demand, and promoted the convenience of correspondents.

Extent, much of it with a double shore and almost honey-combed with inlets and harbors, has been so beliesquered and locked up that the whole immense foreign commerce, which was the very life of the industry and oppulence of the wast region which it borders, has practically ctasted to exist.

THE NAVAL FORCE.

When I entered upon the discharge of my my unbile duties at the head of this departs. trest.

Caimo, Dec.3.—I can get no particulars of the ckirmish near Lumpkins' Milis on the 29th, only that the rebels got the worst of it, very decidedly.

On Monday morning, Col. Lee's cavalry, of which force the Michigan 3d and Kansas Istregiments formed a fart, supported by several guns, land a brilliant encounter with a rebel force on the North side of the Tallanatchis, in which the rebels were again driven back, and a battery of sir of their guns taken, with the horses belonging to the battery. The horses were hitched to the pieces, and had just commerced moving them off. Our casuality so far as I can learn, in this skirmish, was one wounded. with the introduction of the so cannot passa-currence.

The difference between the value of stamps-sold and atamps canceled in the fiscal year 1862 shows \$738,579.96 as the amount in the hands of purchasers on the ist of July, 1864. The whole number of dead letters received and examined during the year is 2,383,018, which is 397,000 less than in the previous year. The whole number of valuable letters sent out by the dead letter office was 51,339, Many interesting details are given in the re-

melecci moving issue no. Car can be as I can learn, in this skirmish, was one wounded.

On Monday afternoon the Federal cavalry crossed the Tallahatchis, and on Monday night the infantry followed. A dispatch says the robels abasdomed their works yesterday, and retreated Bouth, and that the federal forces are now in peacesable possession of what threatened to be a rebel stronghoid.

We have nothing from the expedition which insided at Friar's Foint. N artly all the Federal guabota are now below Heleas.

Carno, Nov. 8.—Gem. Grant's army is still on the move; already his advance has crossed the Tallahatchie River, and is therefore in close proximity to the rebols. Johnson is supposed to be sear, with all the force that Southwestern rebeldom can muster to the defence of Mississippi. Decisive results must be reached in a day or two. The Telegraph is working to Wyatt Station, on the north side of the Tallahatchie. The expedition which left Helean several days since debarked at Friar's Foist, twaire miles below, on the Mississippi side.

Forty-five thousand dellars worth of postage stamps, on the way to Calro postoffice, was injured by fire on the Ohio and Mississippi road on Sunday.

year. The whole number of valuable lotters as ent out by the dead letter office was \$1,250. Many interesting details are given in the report touching the operations of the office. Out of 21,480 cases where esuses of non-deficery were as artisined, only 250 were attributable to the inside of the postmasters; \$22 letters had no address whatever.

Congress at its first session passed an act subsoiding the employment of twosty-five seditional cierks to helitate the return of dead letters to their writers, with the expositional cierks to helitate the return of their compensation. The result thus far shows that an excess of revenue therefrom over the exposures has accrued to the amount of several tacusand dollars.

The whole names of post offices in the United States remaining established on the 20th of June, 1864, was 28,785, of which there were 8,302.

The net increase in the established offices over last year 121. The number of ease acted upon by the appointment office during the year was 7,785. The total postages secrued to the several tacture on the amount of the previous year of \$217,040.88. Of the total amount collected the excess collected in the United States was \$412,607.30, which constitutes the balance yald to the several foreign departments, the cost of exchange being defrayed by the United States. The Postmaster General objects to this cost as inequilable, sind proposes, if possible, to retrieve the Department from this burden.

burden.

The Postmaster General has made special efforts to retrive the foreign correspondence of the country from its complexity now so-embersessing allike to correspondents and to postal officers. Separate negotiations have been found altogether insiequate to secure simple and estistactory errangements. He there fore one and accuracy and the secure of the secure

He therefore opened a correspondence in August last through the Department of Siste with foreign administrations, proposing a coavention of postal representations, proposing a coaventient point, to consider the enumerated difficulties, and the means of remedying.

Several replies have been received from the various governments, and all are favorable and agree to the project. This country, comprising emig-ants from almost every civilized ustion, is especially interested in the subject proposed to be brought before this Conterence. It is a species of postal improvement, requiring the establishment of greater uniformity, and one common principle of arrangement, and is connected with our presperous commercial intercourse with other countries. The mall-lettings which went into operation on the lat of July last in the Western Division, and were effected on such favorable terms as compared with the previous lettings that a reduction of expenditure resulted to the amount of \$450,000. At the same time the length of the routes was increased by 150 miles, with an annual increase of transportation of \$450 miles. Notwithstanding this increase of service, the set savings is over 9 per cent. as compared with the previous term.

Wasmowrox, Dec. 8, 1686.

It may now be positively stated that SecreSmith has finally declided on leaving the Cabinet about the first of January, with the distinet understanding that he shall receive the
vacant judgeship in Indiana. It is well understood that the President would appoint
Schuyler Colfax if he desired it, but he will
not accept. It is not believed now that any
Indianian will get the place. Judge Holt of
Kentucky seems to have the inside track.

The President is believed to have finally

Cols. N. C. McLean and Hugh Ewing of Ohio, have been appointed Brigadier Genorals, also Cols. David Staart and Kirk of Illimois, and Col. W. M. Crocker of Iowa.

Col. Goodwin was examined before the McDowell court martial to-day, and testified that he had often seen McDowell drunk on the streets of Washington. Further examination tended to show that Goodwin's word was not above par. Nothing class was done in the

The total annual cost of the internal service in operation on the 30-h of Jane last was \$5.56. \$5, \$6, which add the cost of the various agencies, route and local, measurgers, &c., \$40. (50.)92, and the cost of the various agencies, route and local, measurgers, &c., \$40. (50.)92, and the cost of the service at that data is \$6.314,450.92, which heliudes \$1.00.000 for the overstand mail route not be fore charged upon the revenues of this Department.

The saving in the lettings of the West to July, 1802, is stributed to a strict adherence to the law of 1803, authorizing what is known as star bids.

The report is never the recommendation for codifying all the postal laws, and hopes it may be done at this session.

Among tee improvements under consiperation by the Postamaster General, is that of one hossing postal stamps on hasness and other envelopes, supplied for that purpose by persons dealing to turnish their own terms the set of stamps, which is an object of great importance to the postar tension, which is an object of great importance to the mails for the sick all being sent up here there is the set of the faspartity is and offers are over the set of the faspartity according to the faspartity according to their removal. In addition to these facts of great present interest, the Quartermaster's cerk sistes, from his own knowledge, that the entite rebetarny has never exceeded 475,000 men, and this was the largest number for which clething and rations were ever required.

PAPER MAKER CONSPIRACY.

ac ciaron, in the hands of suprincipled men, may easily become. While the price of paper, from the scarcily of rag, would usedoustedly have largely hereased, it could never have been raised to rapidly and cuormonisty as it has been within the past two months uniformed to the price. They have, by their action, derect and redirect, more than doubled the price of printing. They have, by their action, derect and redirect, more than doubled the price of printing paper, and tribled that of other kinds. The unitarity deed of such measures will be to diminish the consumption, and thus reduce the price. But the Paper Makers' Association expect to desea the operation of this natural law by diminishing the prediction in the same ratio. They claim the right to put all the paper mills in the country, subject to their control, at work on half time, whenever they find the price of paper spain failing off.

We understand that "the government" of this association is to hold a meeting in this city to-morrow, for the purpose of perfecting their machinery and increasing the price of paper still earther. Some persons who have the nost shith in the working of these achiemes do not heritate to predict that printing paper will solver. In the longing, us, as a matter of course, uch arbitrary and tellash combinations ruins in that see of the strongest and wealthiest members. But they have the power, meanting, to infind very serious injury upon the community at large, and do it irreparable do mage to the business which they assume to protect.

We don't believe that our Illinois paper ma-We now better that but atmost paper ma-kers are parties to this infamous conspiracy against the public good. If the combination persist in their operations, newspaper and book publishers must club together and build paper mills of their own, and never afterwards purchase a sheet from the awindling extor-tioners.

Too would think what you would save would
amount to little or nothing; but let me assure
you if every one of us will save all the rags in the house, it will most assuredly help to make paper chesper. I am a woman and a house-keeper, and I am confident no man has the most remote idea of the amount of rags burned and destroyed in every house in the coun-

Every one knows the vast importance of Every one knows the yast importance of keeping paper as cheap as possible; therefore let those who would not thisk of saving rags for the sake of selling them, save them for the good they will do. Let it but become fashionable to keep a little rag-bag by the sewing machine, and carefully collect all ravelings and scraps, and paper will be cheaper. I will make a proposition: Let every woman in the land carefully search up all the rags in her house, and send them to the "paper man" before the lat of Jannary, 1888, and wait the result.

Jeff. Davis' Riggers in the Treasury Note Business.

[From the Chattmosphess.

[From the Chattmosphess.]

A most remarkable instance of forgery has just been developed in Richmond, in the arrest of certain alares, the servants of some of the high officials in the government, who have been detected in forging Treasury noice, and even entering the Treasury office and obtaining sheets of the uralgued notes, for the operations of the colored experts. That there has been "a alguer in the woodspile," and that he has succeeded in guiting his fingers "full of de notes," is a melanoholy certainty. The Zewsiese of the 14th given the following account of the sfide:

The army, I think, is in a very disorganized scate, and we will have to get some one dise in command before it is ever organized action. And what it cots so bad is that we are stationed near a railroad, where the men expect to get things, and to octohing or shoes are procured yet. Last night our Quariermaster drew and issued to our regiment about twenty pairs of shoes, thirty uniforms, and two overcosts. How ridiculous to give that little to 500 mes, who are every one entirely destitute of citables and shoes. Meaners uniform on, with a regged blanket to cover with, and next morning awake covered with snow, and almost frozen to doubt. I suffered the same myself, but had on abose. When I awoke I found my very heir frozen, and show all over us. They have given out about two tents to a regiment for the sick to sieep in. I have the promise of one. If I ever get it! a great extent, remeins ungathered. There
are not laborers enough accessible to them to

generally true all over the state among those
whose agricultural operations extend beyond
the ability o their own unaided hands. We
hear of their diering very extravagant wages,
without being able to procure the requisite

in the State, by many thousands, to save the
crops already grown from destruction, to say
nothing of preparation for furure operations.
Most of the volunteers from this state under
the last two calls were from the farming population, and as a general thing they were the
novel industrious, enterprising and reliable latorers which the country afforded. Many
neighborhoods were entirely deprived of adelooked young mee, and only the lame and the

A scouting party, last night, brought into camp sidy or skyts pageons, of different ages and sizes, who have just emerged from a wate of bondage to freedom. The transition is sadden and great; but whether the change will prove to be an setual curse to them or a blessing, is a question which time alone can determine. The once wealthy masters look woc-begone, as if they islt that the day of doom had come. The plantations are many of them almost entirely deserted. Some of the slaves go to the city, to be enisted as sodiers, Some are willing to work on the plantations in aving the supar crops, at 810 per month, and some may be langing about the several military camps. From many of the plantations the masters and mistresses are gone, having retreated with their army and guerilla bands beyond our lines, to swait, probably, the day—never to come—when they shall retake this rich country and be restored to their postessions. Such is their instantion, that every man among them we converse with scens possessed of the bellef that the Yankees will yet be driven out of this country, and the Confederate Government be catable-bed. I have never before seen such a striking verification of the old heatten syring, "Count Desse will perfer prize demental." Testeracy, our Colonel detailed a comprany of men, with an officer, to go between thirty and forty miles from here, for the purpose of taking possession of two large plantations, just confined the series of Russia.

SLAYCHFORD, one also for conveying to the surface the foul air enginedered by the fame, and in addition a line by which to lower it into the water and draw it up again, making three separate lines for the inntern only. Mr. Faller's invention really dispenses with the whole of these lines, since the tube feeding the flame with fresh air may be attached directly to the fresh air pipe for the diver binned; but when so used requires but a single "aupply" tube, the foul sir within the inntern passing through an ingusionally airsayed spring vaive directly into the water.

Now when we remember that the diver himself, independently of any inntern, must have two lines attached to his armore—one for the fresh air he himself must have for breaking, and the other a "life line," by which he stends to those on the surface—it will be seen readily that on the old plus the diver must be excumbered at least with five lines, by which the rick of getting helplessly entangled in them greatly increases the danger of his already hazardens vocation. Not a day or an hour ought to be lost in providing for the intense and overwhelming misery produced in Lancashire and a small portion of Cheshire by the cotton famine. The embarmased districts contain a population of about 2,500,000, and the intensity of the misery may be interred from the fact that panperism is daily increasing there at the rate of a thousand a day. We are only yet in the middle of autumn, and the severally of an English winter rarely makes itself felt on this side of Christmas.

Three agencies which the President has solemly resolved to apply, will speedily tumble the Rebellion and its Cause into the same grave: Vigorous oftensive movements of the same yand navy, and the fearless enforcement of the confiscation laws and Proclamation of Precdom. The first will give victory over the foes of the Union; the second will stop taxation and pay the National debt, and the third will wrest from the rebels their staff of support, and is the beautiful language of our honest, righteous and patriotic Chief Magistrate:

Figures and fraud show that Elder and Color he Republican candidates

Figures and fraud show that Eider and Color the Republican candidates for the Legislaturs from this district, are elected by a small majority—Color, five votes over Busey, and Eider thirty votes over Bosey, and Eider thirty votes over Bosey, and Eider thirty votes over Bosey, see the votes in one of the townships in Champaiga county, which were cast for Busey, were thrown out, because the stapid cierk of the election wrote Jones Busey upon their poil books instead of J.S. Busey, as was upon all the tickets if. Busey put out. Upon this ground—through the mistake of the cierks—Mr Busey, for the time being, is defeated by Color. But the matter will be looked into, and Mr. Busey will receive his certificate of election, and take his sest in the Legislature this winter.

An Ice Ordinance Needed.

The attention of the Common Council is called to the necessity which exists, for the passage of an ordinance with a severe penalty attached, to protect consumers from the repested and dangerons abuses practiced by dealers in les. It is well known to many of our citizens that an immense quantity of lee is annually cut from the basin isside the break water, and from the Chicago river. With this lee, there is, as a natural consequence, mixed up a mass of fifth and nauseating excresence, which riese to the surface, and is frozen in. We know it is alleged by the dealers, that lee taken out of the places named, is not delivered to families, but is used by brewers, butchers and other parties who require large quantities for cooling purposes. It this were true it would be well enough, but unfortunately for our citizens we have reason to believe

that many families were supplied during the past summer with the very ice there gathered. Hundreds of house-keepers will attest to the unpleasant smell, and anspicious looking sedement accompanying a glass of ice water and scores of them we venture to say have wondered how Calumet, Crystal Lake or Willow Springs ice could be so impure. We do not intend these remarks to apply to any particular commany or firm, for we believe they are intend these remarks to apply to any particu-lar company or firm, for we believe they are all more or less guilty of the practice com-plained of. What is needed to prevent a re-currence of the same evil is a city ordinance with stringent penalties for each violation. Then and not till then can the protection sought be secured. With lakes and rivers perfectly pure so near at hand, there is no ex-cuse for dirty ice to be served out, and the parties interested should be held responsible for the abuse of public confidence.

ties interested should be held r the sbuse of public confidence. LAW INTELLIGENCE.

To the Honoranie Board of Supervisors of Cook County;
Gasws:—I herewith attack a blank form of a jurore certificate, as drawn assisapproved by your committee. By the revenue law of the United States, cortificates, other than such as are specially assed in the act, are required to be stamped—the stamp duty being ten cause. I would therefore respectfully call your attention to the question whether juror certificates are subject to the stamp duty, and if they are, what change in the form can be made to relieve the county of the burden of payment of the duty, which will amount to no inconsiderable sum in the courte of the year. considerable sum in the course of the year,
Respectfully, UR HANLEY,
Dep. Clerk Superior Court of Chicago,
Referred to Judiciary Committee.
